

Vinisol 10

Description

VINILSOL 10 is a solvent compound, designed as primer for PVC pressure sensitive tapes. It contains rubbers and resins in an optimal ratio, to produce a very good adhesion to the PVC film (rigid/plasticized) and to the rubber based adhesives.

Application

Coat with approx. 10 - 12 g wet/sqm of this solution, by Meyer-bar or reverse roll or rotogravure.

Technical Specifications

Method of analysis	MU	Standard
--------------------	----	----------

- | | | |
|--|-----|-------------------------|
| 1. Total Solids | % | 10±1 |
| 3. Brookfield Viscosity
25°C | cps | 50 - 200 ⁽¹⁾ |

⁽¹⁾ No 1 RV; 50 RPM

Handling

Before use, VINILSOL 10 must be well stirred. For the cross-linking of coated adhesive, add to 100 parts of this solution 1 to 1,5 pp of isocyanate, like CURING AGENT RF/AE or CURING AGENT D (Ichemco).

Pot-life will be 24 hours after this addition.

Packing

VINILSOL 10 is supplied in 200 l drums.

Storing

Product must be stored in a ventilated and dry place. Shelf life is 6 months.
