

Uvistop PO3

(Provisional)

Description

UVISTOP PO3 is a mixture of an inert filler and a UV absorber. The UV absorber belongs to the class of benzotriazoles and confers stability to UV light to different polymers. The UV absorber has been mixed with an inert filler in order to obtain easier handling and dosing.

Technical Specifications

Method of analysis	MU	Standard
--------------------	----	----------

1. Total Solids	%	99.5±0.50
-----------------	---	-----------

Handling

The product can be used in hot-melt or solventborne systems. The amount to be added depends upon the substrate and upon the desired characteristics of the finished product, the recommended dosage is 1-6%.

Packaging

The product is supplied in fiber drums (20.500 kg).

Storing

The product should be stored at room temperature, away from direct sunlight and moisture.

Use within 24 months from production date (unopened and in the original packaging).
