

VINILPRIMER E6

(Provisional)

Description

The **VINILPRIMER E6** is a water-based primer for plasticized and rigid PVC films. It is based on a synergistic blend of elastomers (natural and synthetic) and resin dispersions, properly stabilized and formulated.

Application

The **VINILPRIMER E6** ensures perfect adhesion between the adhesive compound (made of natural or synthetic rubber) and the PVC film, without cross-linking. It can be used for self-adhesive films for packaging or technical applications.

Technical Specifications

Method of analysis	UoM	Standard
1. Total Solids	%	6 ± 1
3. Brookfield Viscosity 25°C	mPa.s	100 ÷ 500 ⁽¹⁾
8. pH		8 ÷ 10

⁽¹⁾ No 1 RV; 100 RPM
Solvents

water

Storing

This product must be stored at temperatures between +10 and +40°C.

PROTECT FROM FREEZE

Use within 6 months from production date (unopened and in the original packaging).

Handling

The **VINILPRIMER E6** is ready to use.

Application: 1.0–1.5 g/sq m dry. **STIR WELL BEFORE USE**

Packaging

The product is supplied in iron drums (200 kg); IBC containers (1000 kg).
