

Selvol E 523

Description

SELVOL E 523 is a partially hydrolized polyvinyl alcohol.

Degree of hydrolysis = 87-89%.

Application

SELVOL E 523 can be used in various application: paper, textile, adhesives,...

Technical Specifications

Method of analysis	MU	Standard
2. Volatile Content in Powdery Products	%	< 5
3. Brookfield Viscosity 25°C	mPa.s	23 - 27 ⁽¹⁾
8. pH	pH	5 - 7 ⁽¹⁾
700 Ash ⁽²⁾	%	< 1
⁽¹⁾ 4% water solution		
⁽²⁾ 5g/800°C		

Packaging

The product is supplied in plastic bags (25 kg).

Storing

Keep the product at temperatures between +5 e +35°C, protected from direct sunlight and humidity.

Use within 24 months from production date (unopened and in the original packaging).
