

Uvistop TRM 1

Description

UVISTOP TRM 1 is a synergistic blend of light stabilizers in powder form.

Application

UVISTOP TRM 1 is designed to prevent the UV light degradation, during processing and ageing, of synthetic thermoplastic rubbers (SIS, SBS) and natural rubber, used in the production of PSA adhesive tapes, especially for white, light coloured or transparent varieties

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	99±1
5. Melting Range	°C	60 - 80

Handling

The recommended concentration is 0.2-0.4 pphr (parts per hundred of rubber).

Packaging

The product is supplied in fiber drums (50 kg).

Storing

Use within 24 months from production date (unopened and in the original packaging).
