

Blendex Seal DH 1

Description

BLENDEX SEAL DH 1 is a heat sealable adhesive, based on a modified acrylic polymer, for applications where a soft and dry hand, without tack at room temperature, is requested. It shows excellent adhesive properties after a few seconds at 70°C or more.

Application

BLENDEX SEAL DH 1 is used as a heat sealable adhesive for various products (fabrics, non-woven, leather, synthetic leather, foams, ...).
Recommended minimum temperature is 70°C.

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	30±1
3. Brookfield Viscosity 25°C	mPa.s	1,000 - 2,000
8. pH Solvents	pH	9 - 10 water

Handling

BLENDEX SEAL DH 1 must be applied by hot transfer after drying, or by direct coating.

Packaging

BLENDEX SEAL DH 1 can be supplied in 200 l iron drums or 1000 l tanks.

Storing

Use within 6 months from production date (unopened and in the original packaging).
