

Color Lac N66

Description

COLOR LAC N66 is a special polyamide transparent ink in solvent solution. Total Solids value is about 19%.

It is designed to have a low adhesion to BOPP and PET films.

Application

COLOR LAC N66 has been developed for security tapes production.

Technical Specifications

Method of analysis	MU	Standard
54. Viscosity Solvents	Sec.	18 - 28 ⁽¹⁾ ethyl alcohol / ethylacetate / isopropyl alcohol

⁽¹⁾ 20% solution in ethanol/ethyl acetate (70/30)

Handling

COLOR LAC N66 is ready to be used with flexo printing process or rotogravure coating system (engraved roll with 80 cells per linear inch).

Suggested coating weight is about 4 g (wet)/sqm, depending on the image that will appear when you open the security tape.

If necessary you can dilute with ethylacetate, isopropyl alcohol or ethanol.

Packaging

The product is supplied in iron drums (10 kg).
