

Color Paste AS White 14

(Provisional)

Description

COLOR PASTE AS WHITE 14 is an inorganic pigment (C.I. PIGMENT WHITE 6) blended with resins and solvents.

Application

The product is designed for coloring solvent based acrylic adhesives, aromatic and aliphatic polyurethanes in DMF and aliphatic polyurethanes in IBA/toluene.

Handling

The quantity to add depends on the desired final effect; usually it is 5-10%.

In order to avoid dots on the coated film, it is very important to disperse COLOR PASTE AS WHITE 14 well into the product. To avoid sedimentation, we recommend to stir well the colored product before each use.

Packaging

The product is supplied in iron drums (25 kg).

Storing

Use within 12 months from production date (unopened and in the original packaging).
