

Primer EPA W 9

(Provisional)

Description

PRIMER EPA W 9 is a water borne product, formulated with PU polymers. Its main application is for flexible packaging.

Application

The product is used as a primer for the printing and the metalization processes. It has to be applied on corona treated BOPP and PET films. The coated product has no residual tack.

Storing

Store at temperatures between +5°C e +40°C. Protect from freeze.

Use within 6 months from production date (unopened and in the original packaging).

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	20±1
3. Brookfield Viscosity 25°C	mPa.s	< 150 ⁽¹⁾
8. pH Solvents	pH	6.5 - 8.5 water

⁽¹⁾ No 1 RV; 100 RPM

Handling

Stir before use. The product can be applied by traditional coating methods: Meyer-bar, rotogravure, ecc. To increase the drying speed, a small amount of isopropyl alcohol can be added. Recommended coating weight: 5 ÷ 7 g/m² wet.

Packaging

The product is supplied in iron drums (170 kg); IBC containers (1000 kg).
