

Uvistop UV-HP

(Provisional)

Description

UVISTOP UV-HP is a synergistic blend of light stabilizers (HALS) and UV absorbers (benzotriazole class) in powder form.

Application

UVISTOP UV-HP is designed to prevent the UV light degradation of many polymers. It's suggested for the protection of solvent borne rubber adhesives, due to its high solubility in aliphatic solvents.

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	99±1

Handling

The recommended concentrations range is between 0.5% and 1% (calculated on the rubber content), depending on the substrate, processing conditions and application.

Packaging

The product is supplied in fiber drums (50 kg).

Storing

The product should be stored at room temperature, away from direct sunlight and moisture.

Use within 24 months from production date (unopened and in the original packaging).
