

# Curing Agent W 18

(Provisional)

## Description

CURING AGENT W 18 is a bi-functional aziridine crosslinker diluted in dipropylene glycol methylether.

## Application

The product is designed to improve cohesion, hydrolysis and chemicals resistance of resins, binders and adhesives.

## Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	19±1
24. Density	g/ml	1 - 1

## Handling

CURING AGENT W 18 can be used both in solvent and waterborne systems. The quantity to add must be defined according to the process; as a start, we recommend staying in the range of 1-3%. CURING AGENT W 18 must be added to the product while stirring. Pot life is longer than typical crosslinkers, but needs to be verified on each system. CURING AGENT W 18 is not suitable for the production of 1K systems.

## Packaging

The product is supplied in iron drums (25 kg); iron drums (200 kg); IBC containers (1000 kg).

## Storing

Store in the original container in a cool and ventilated area. Keep container well sealed,

when not in use.

Use within 6 months from production date (unopened and in the original packaging).
