

# Antiox W 55

(Provisional)

## Description

ANTIOX W 55 is a 50% TS aqueous dispersion of a sterically hindered phenolic antioxidant. ANTIOX W 55 protects the substrates against thermo-oxidative degradation during manufacturing, processing and end-use.

## Application

Antiox W 55 is recommended for the stabilization of PVC. It is also a very effective antioxidant for natural and synthetic latex water borne adhesives.

## Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	52±1.50
3. Brookfield Viscosity 25°C	mPa.s	< 300 <sup>(1)</sup>
8. pH Solvents	pH	7 - 8 water

<sup>(1)</sup> No 1 RV; 100 RPM

## Handling

Add ANTIOX W 54 directly in the water dispersion. Recommended quantity for water borne adhesives is 0,15-1%.

## Packaging

The product is supplied in plastic drums (180 kg).

## Storing

Store at temperatures between + 5 and + 40°C. Protect from freezing. Stir well before use.
