

# Tackwhite AR 68 (V1)

(Provisional)

## Description

TACKWHITE AR 68 is a water borne pressure sensitive adhesive based on acrylic polymers. It has a very good anchorage on corona treated polyolefin films. The coated product has a very high resistance to plasticizers and its adhesive properties are stable after ageing.

## Storing

TACKWHITE AR 68 must be stored at temperature between +5°C and +30°C.

Protect from freeze.

Use within 6 months from production date (unopened and in the original packaging).

## Application

TACKWHITE AR 68 is suggested for the production of PVC adhesive tapes.

## Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	59±1
3. Brookfield Viscosity 25°C	mPa.s	8,000 - 16,000 <sup>(1)</sup>
8. pH Solvents	pH	5 - 7 water

<sup>(1)</sup> N. 5 RV; 20 RPM

## Handling

The product can be applied by Mayer bar or reverse roll.

If necessary, it can be thickened with a suitable acrylic based thickener.

## Packaging

The product is supplied in iron drums (200 kg); IBC containers (1000 kg).
