

Color Paste WI White 6

(Provisional)

Description

COLOR PASTE WI WHITE 6 is a waterborne dispersion of titanium dioxide (Pigment White 6). Titanium dioxide concentration is 60-70%.

Storing

Product must be stored at temperatures between +5°C and +35°C. Keep the containers well closed. Use within 12 months from production date (unopened and in the original packaging).

Application

COLOR PASTE WI WHITE 6 is a very efficient white pigment, which is aimed at colouring water borne products, as acrylic, vinyl or polyurethane dispersions. It is recommended for the production of white packaging tapes. It provides a high whiteness.
