(unopened and in the original packaging).

Tacksol 10/85 HST

Description

TACKSOL 10/85 HST is a high performance solvent borne pressure sensitive adhesive, based on natural and synthetic rubbers and special resins. It has an exceptional resistance to ageing, light and heat, much more compared to other products based on natural rubbers only.

Application

TACKSOL 10/85 HST can be applied on any substrate (paper, PET, PP, PE, PVC). Production: protective p.s. films and tapes.

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids 3. Brookfield Viscosity 25°C Solvents	% mPa.s	25±2 15000 - 30000 ^(I) toluene / hexane
^(I) No 6 RV; 20 RPM		

Film properties

Method of analysis	MU	Standard	
11. Peel Adhesion on Steel	g/in	900	
17. Rolling Ball Tack 97. Loop Tack Test	cm g	4 1,200	

Average values; 22±2 g/m² of dry adhesive on PET film 36 μm

Handling

In order to increase thermal or mechanical resistance, it is necessary to cure the product with isocyanate (e.g. CURING AGENT D or CURING
