Wetting Agent 75

Description

Sodium salt of a sulfosuccinic ester.

Application

WETTING AGENT 75 can be used for improving the wetting properties of polymer dispersions, especially during the processing. It can be employed in combination with non-ionic wetting agents and emulsifiers.

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	75±1
8. pH		5 - 8
Solvents		water / ethyl alcohol

Handling

Typically, the addition of 0.5-1% of **WETTING AGENT 75** is enough to prevent problems caused by insufficient wetting. Add **WETTING AGENT 75** to the dispersion while stirring. Let the product stand at least 24 hours before use.
We recommend small scale testing of formulations containing **WETTING AGENT 75**.

Packaging

The product is supplied in plastic tanks (10 kg); iron drums (200 kg); IBC containers (1000 kg).

Storing

Store at temperatures between +10 and +30°C.
Use within 12 months from production date (unopened and in the original packaging).

Build date 11 Sep 2025
