Selvol E 523

Description

SELVOL E 523 is a partially hydrolized polyvinyl alcohol.
Degree of hydrolysis = 87-89%.

Application

SELVOL E 523 can be used in various application: paper, textile, adhesives,...

Technical Specifications

	Method of analysis	UoM	Standard
2.	Volatile Content in Powdery Products	%	≤ 5
3.	Brookfield Viscosity 25°C	mPa.s	23 ÷ 27 (1)
8.	pH		4.5 ÷ 6.5 (1)
700.	Ash (2)	%	≤ 0.5

(1) 4% water solution
(2) 5g/800°C

Packaging

The product is supplied in plastic bags (25 kg).

Storing

Keep the product at temperatures between +5 e +35°C, protected from direct sunlight and humidity.

Use within 24 months from production date (unopened and in the original packaging).

Above information is reliable, but does not constitute warranty.
