

Catalyst DOTL

Description

CATALYST DOTL is a liquid carboxylated octyl tin laurate.

Application

Technical Specifications

Method of analysis	MU	Standard
24. Density	g/ml	1 - 1.02
83. Color		< 5 ⁽¹⁾
89. Refractive Index at 20°C		1.467 - 1.471

⁽¹⁾ Gardner colour

-30°C to restore the liquid state.

Use within 6 months from production date (unopened and in the original packaging).

Handling

Suggested quantity: 1-2.5 phr.

Pre-dilute CATALYST DOTL in ethylacetate, stir well. Add the solution into the drum.

Add the usual cross-linker quantity and coat. Pot life of the adhesive after these two additions is 3-4 hours.

Packaging

The product is supplied in plastic drums (25 kg).

Storing

CATALYST DOTL must be stored at temperature between 10 and 40°C.

The product cannot stand cold and shows tendency to solidify below 0°C. In case, heat it up till 25
