

Blendex Seal DH 14

(Provisional)

Description

BLENDEX SEAL DH 14 is a polyester based, aliphatic aqueous polyurethane dispersion.

Application

BLENDEX SEAL DH 14 is used as a heat sealable adhesive for various products. It is suggested for textile products, because it has a good resistance to various washing cycles. It gives a transparent, medium-hardness film, without residual tack.

It develops adhesive properties at temperatures higher than 140°C.

Use within 12 months from production date (unopened and in the original packaging).

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	40±1
8. pH		7 - 9
Solvents		water

Handling

BLENDEX SEAL DH 14 can be diluted with water. It can be applied by hot transfer after drying or by direct coating; if necessary it can be thickened with a suitable product.

Packaging

The product is supplied in iron drums (200 kg).

Storing

Store in closed containers at temperatures between 5 and 40°C. Protect from freezing.
