

S.L. 24

(Provisional)

OBSOLETE

Description

S.L. 24 is a water dispersion of a SBR latex.
Tg = - 35°C

Storing

Keep at temperatures between +5 and +40°C.
Protect from freezing.

Application

S.L. 24 is used as binder for fabrics, paper, ...The product has a minimum residual tack.

Technical Specifications

Method of analysis	MU	Standard
Solvents		water
1. Total Solids	%	
XZ 97224.00		56±1
3. Brookfield Viscosity 25°C	mPa.s	
XZ 97224.00		< 800 ⁽¹⁾
8. pH		
XZ 97224.00		7 - 9

⁽¹⁾ No 2 RV; 50 RPM

Handling

S.L. 24 is extremely compatible with natural latex and it can be considered a synthetic alternative to this product. S.L. 24 can be formulated with tackifiers, thickeners, surfactants, pigments in dispersion, etc.

S.L. 24 can be applied with traditional methods: mayer bar, foulard, rotogravure, air blade, etc.
