

# Uvistop UV-HP

---

## Description

UVISTOP UV-HP is a synergistic blend of light stabilizers (HALS) and UV absorbers (benzotriazole class) in powder form.

## Application

UVISTOP UV-HP is designed to prevent the UV light degradation of many polymers. It's suggested for the protection of solvent borne rubber adhesives, due to its high solubility in aliphatic solvents.

## Technical Specifications

---

Method of analysis	UoM	Standard
1. Total Solids	%	99 ± 1

---

## Handling

The recommended concentrations range is between 0.5% and 1% (calculated on the rubber content), depending on the substrate, processing conditions and application.

## Packaging

The product is supplied in plastic bags (20 kg).

## Storing

The product should be stored at room temperature, away from direct sunlight and moisture.

Use within 24 months from production date (unopened and in the original packaging).
