

Tacksol 20/83 LHX

(Provisional)

Description

TACKSOL 20/83 LHX is a pressure sensitive adhesive, based on natural rubber and special resins dissolved in hexane. After curing, the product has a very high cohesion, medium tack and medium adhesion.

Application

TACKSOL 20/83 LHX is recommended for the production of BW PE protective films and tapes for smooth surfaces and PVC.

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids Solvents	%	16.5±1 hexane

Handling

TACKSOL 20/83 LHX can be diluted with aliphatic and aromatic solvents in order to achieve the desired viscosity. For protective tapes the product must be cured with CURING AGENT P65 (0.5 - 2%). Reaction starts immediately, so it is recommended to use the product in a short time after the activation. The crosslinking mechanism depends upon different aspects as adhesive concentration, amount of crosslinker, temperature. We suggest to check in advance curing conditions, in order to avoid to spoil material.

Packaging

The product is supplied in iron drums (145 kg).
