Celloprimer W

Description

CELLOPRIMER W is a primer for cellophane film, formulated with a balanced blend of elastomers.

Application

CELLOPRIMER W allows to obtain a perfect adhesion between the adhesive mass (based on natural or synthetic rubbers) and the film without any curing.
It is mainly used for self-adhesive tapes and films, either for packaging or special applications.

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	25±1
8. pH		6 - 8
Solvents		water

Handling

It can be further diluted before usage if a lower viscosity is required.
If necessary it can be thickened with typical acrylic thickeners.
Application: 1.0 - 1.5 g dry/sqm

Packaging
