

# Celloprimer W

Use within 6 months from production date (unopened and in the original packaging).

## Description

CELLOPRIMER W is a primer for cellophane film, formulated with a balanced blend of elastomers.

## Application

CELLOPRIMER W allows to obtain a perfect adhesion between the adhesive mass (based on natural or synthetic rubbers) and the film without any curing. It is mainly used for self-adhesive tapes and films, either for packaging or special applications.

## Technical Specifications

| Method of analysis | MU | Standard       |
|--------------------|----|----------------|
| 1. Total Solids    | %  | 25±1           |
| 8. pH Solvents     | pH | 6 - 8<br>water |

## Handling

It can be further diluted before usage if a lower viscosity is required. If necessary it can be thickened with typical acrylic thickeners. Application: 1.0 - 1.5 g dry/sqm

## Packaging

The product is supplied in iron drums (200 kg); IBC containers (1000 kg).

## Storing

This product must be stored at a temperature between +10 and +40°C. PROTECT FROM FREEZING
