

# Solacril WS 33

## Description

SOLACRIL WS 33 is a repulpable water soluble acrylic polymer, in ethyl-alcohol, acetone and water solution.

## Application

SOLACRIL WS 33 is a base to obtain finished adhesives, with excellent properties of tack and water solubility.

## Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	30±1
3. Brookfield Viscosity 25°C Solvents	mPa.s	2,000 - 7,000 <sup>(1)</sup> water / acetone / ethyl alcohol

<sup>(1)</sup> N. 4 RV; 20 RPM

## Handling

The polymer must be mixed with suitable plasticizers and additives, in order to develop the required adhesive properties.

## Packaging

The product is supplied in iron drums (200 kg).

## Storing

Product must be stored at temperatures between +5°C and +40°C.

Use within 12 months from production date (unopened and in the original packaging).
