

Tackwhite A 605

Description

TACKWHITE A 605 is a low Tg Acrylic polymer emulsion that forms extremely clear, elastic and tacky films when dried over 0°C .

Application

TACKWHITE A 605 is a good pressure sensitive adhesive for different applications. The dried film has a very aggressive initial tack and a good cohesion. It can be modified with tackifier and then used for labels, foams, fabrics, synthetic leathers, double-side tapes,...

Packaging

TACKWHITE A 605 is supplied in 200 l, 1000 l drums or in tanks.

Storing

To ensure safe storage of this emulsion, containers should be well sealed to prevent the water evaporation and skin forming. The emulsion must be stored between 5-40°C. Shelf life is 3 months.
