

Flameretarder GO

OBSOLETE

Description

FLAMERETARDER GO is a halogen based flame retardant water dispersion.
The dispersion is non-ionic.

Application

FLAMERETARDER GO has been developed as flame retardant binder for textile applications.
It is used in addition to latex and it can be applied by padding and coating techniques on fabrics, fibers, non-woven, etc. It imparts excellent flame retardant properties.

Packaging

200 kg plastic drums.

Storing

FLAMERETARDER GO must be stored at temperatures between +5 and +40°C .
Shelf life is 3 months.

Technical Specifications

1. Total Solids	%	
FLAMERETARDER GO		70±1.50
3. Brookfield Viscosity 25°C	mPa.s	
FLAMERETARDER GO		7,000 - 11,000 ⁽¹⁾
8. pH	pH	
FLAMERETARDER GO		8 - 10

⁽¹⁾ No 6 RV; 20 RPM

Handling

If coated, it is suggested to thicken the product with a suitable thickener.
Adhesion on natural and synthetic fibers is outstanding.
The product tends to separate after a prolonged storage: it is recommended to stir it well before using it.
