

# Diluent C PVC

---

## Description

DILUENT C PVC is suggested for cleaning rolls and machines after use of COLOR INK PVC.

It can also be used for the dilution of COLOR INK PVC.

Density: 0.80 kg/l

## Technical Specifications

Method of analysis	MU	Standard
Solvents		MEK

## Handling

Since DILUENT C PVC contains methyl ethyl ketone, be very careful to avoid excessive concentration of vapours. It has a high volatility.

## Packaging

The product is supplied in metal drums (15 kg).

## Storing

Keep the containers well closed and far from ignition sources and flames: the product is flammable.

Store at temperatures between +20°C and +40°C.

Use within 12 months from production date (unopened and in the original packaging).
